

Collections with Weathered Finishes

reclaimed and restored timber

www.1825interiors.com.au

THE MANUFACTURING PROCESS

Some of our reclaimed collections have an almost raw, straight-from-the-pallet appearance, an authentic 'weathered' look. Each product is only very lightly sanded so the natural characteristics of the timber will be more evident in our weathered collections than they are in our more 'finished' collections. And because each product is handcrafted, no two pieces are exactly the same. Our furniture is made using time-honoured construction techniques: the tongue and groove process with free-floating panels, and dovetail joints. Consequently each piece of reclaimed furniture has its own characteristics and will behave differently.

WHERE OUR TIMBER IS SOURCED

1825 interiors specialises in reclaimed timber furniture which is made from carefully selected pine shipping pallets, sourced from all over the world. Our environmentally conscious wood sourcing programme minimises the impact on our natural environment. This gives our furniture a genuine 'old world' feel and a tick for being environmentally sound.

FREE-FLOATING PANEL DESIGN

Our free-floating panel design allows for the natural expansion and contraction that occurs in reclaimed timber products due to changes in temperature and humidity. As the timber expands and contracts, the gaps between the panels will open and close. Our stores provide special waxes, in colours to suit your furniture, which can be used to fill the gaps if desired.

NATURAL CHARACTERISTICS OF RECLAIMED TIMBER

As 1825 interiors' products are all natural, it is perfectly normal for your new purchase to resemble any of the above images. Nail holes, timber knots, colour variation and timber block patches are common and not considered defects.

MAINTAINING RECLAIMED TIMBER

When positioning furniture in your home, do not place it in direct sunlight, close to heaters or outdoors. Doing so can result in damage that is not covered by warranty.

Do not use cleaners that contain ammonia, spirits or silicone. Test all cleaning products in an inconspicuous area first. 1825 interiors recommends using the following Howard products to nourish and enhance recycled timber furniture.

Howard Feed-N-Wax

Feed-N-Wax is a special blend of beeswax, carnauba wax and orange oil. It enhances the natural beauty and depth of grain in finished and unfinished wood, highlighting its golden hues and leaving a protective coating. Used regularly, this product will help prevent drying, fading and cracking while preserving the timber finish. Not suitable for painted surfaces.

Wax-It-All

Wax-It-All is a thick, smooth blend of beeswax, carnauba wax, and food grade mineral oil which revives faded surfaces and helps protect wood from drying out and cracking. Use Wax-It-All to care for a multitude of surfaces. This innovative product revives faded wood, metal, and plastic furniture, polishes wood and painted cabinets, and helps prevent tarnishing on metal surfaces. It enhances and protects surfaces to make them look better and last longer.

CARING FOR PAINTED FINISHES

Howard Clean-A-Finish

Clean-A-Finish effectively cleans all timber surfaces using a traditional blend of gentle yet powerful natural soaps. It easily removes dirt and build up from furniture and is recommended for painted surfaces. It is non-toxic and biodegradable and does not contain any harmful chemical cleaning agents. Apply a light spray onto a soft cloth, not directly onto the surface of the timber.

Take care when using blue glass cleaners as they can stain painted finishes.

WARRANTY

1825 interiors warrants that our reclaimed and restored timber furniture is free from manufacturing, structural or materials defects for 12 months from the date of delivery. More information can be found on our website or on the warranty card issued with the product at time of purchase.
