

## Care of Cane Furniture

Cane furniture may comprise of many pieces of cane in various shapes and sizes. It can include sea grass cord, plait and matting; rattan; core, sheet, split, binding, plaited & chair cane; willow; bamboo; oriental painted lacquer work and occasionally timber.

When positioning cane furniture in your home, do not place it in direct sunlight or close to heaters. Sunlight can affect the colour and dry air can cause it to become brittle and break. On the other hand, high humidity can encourage the growth of mould and mildew so remove any natural cane furniture from undercover outdoor areas as required.

The best tool for removing dust and dirt from cane furniture is a vacuum with a brush attachment. After vacuuming, wipe the cane over with a damp cloth dipped into a diluted solution of warm water and mild detergent. Allow to dry for approximately two hours before use.

- Do not leave in the weather.
- Do not stand on the cane.
- Do not sit on the cane in wet clothes or while it is still damp after cleaning.
- Do not use silicone based cleaners.
