

Care of Upholstered Beds

1825 interiors has a wide selection of beds which are upholstered in a variety of fabrics. The fabric composition of each bed will vary and this information can be found on our website as well as the information tag attached to the product at time of purchase. The fabric composition will determine the specific care instructions for each product, however general fabric care remains the same.

General Care

Vacuum weekly using low suction.

Spot Cleaning

It is important to treat stains and spills as soon as they occur. For peace of mind, we recommend purchasing fabric protection for a small additional cost which is applied for you by our trained staff before delivery

Colour Care

Avoid direct sunlight and heat. It is important to note that no fabric is 100% colour fast and it is impossible to prevent colours from fading unless adequate precautions are taken in the home.

Positioning & Assembly

Ensure that the bed is lifted, not dragged, across the floor or you will risk damaging both the product and the floor. Although most of our furniture is fully assembled, beds do require some assembly and an instructional video can be viewed on our website. Avoid over-tightening bolts as cross-threading can occur. Do not jump on the bed or make alterations to the support base.

Manufacturer's Warranty
